FEDERAL COMMUNICATIONS COMMISSION
OFFICE OF THE SECRETARY

March 14, 2001

Mr. N. Jerry Simonoff, Chairman
Virginia Wireless E-911 Services Board
Richmond Plaza Building, Suite 135
110 South Seventh Street
Richmond, Virginia 23219-3931

Dear Mr. Simonoff:

Attached are letters from the County of York to those wireless carriers providing service to this area requesting Phase II service. As you are aware, York County is currently Phase I capable and we look forward to becoming Phase II compliant. We anticipate within the next 60 days to have cost estimates to deploy these services and will keep you and the Wireless Board informed of our progress.

We look forward to working with the wireless providers and the Wireless E-911 Services Board in implementing this essential public safety tool in our community.

If you should have any questions, please do not hesitate to contact me.

Sincerely,

D. Terry Hall
Communications Manager

VIRGINIA

March 14, 2001

Mr. Jesse Pennington
NTelos
9011 Arboretum Parkway, Suite 295
Richmond, Virginia 23236

Dear Mr. Pennington:

On behalf of the County of York, I am hereby making a formal request for Phase II enhanced wireless 9-1-1 services. The County of York is aware of the October 1, 2001 deadline for the provision of Phase II services. As the County of York presently is receiving Phase I services, we recognize the necessity and importance of Phase II deployment in identifying a more accurate location of 9-1-1 wireless calls, which is essential for the protection of life, health and property. Far too often the response to a request for emergency help is delayed while attempts are made to identify the location of the caller who is often unaware of their own exact location.

Therefore, in accordance with the provisions of FCC Docket 94-102, the County of York has taken steps to ensure that our customer premise equipment is capable of receiving and utilizing the data elements associated with the service and further advises that it has an adequate cost recovery mechanism in place to bring our customer premise equipment to the level necessary to receive Phase II data. The County of York's Phase II customer premise equipment upgrades will be finalized prior to the delivery of this service.

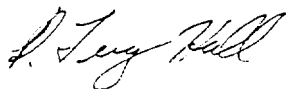

In order to ensure timely planning and communication among the wireless carriers and the County of York in the deployment of Phase II services, I would appreciate your compliance in providing a description of the hardware and software changes which will be necessary to transmit Phase II data to our PSAP and your strategy and schedule for the installation and/or modification of such hardware or software changes.

March 14, 2001

Page 2

Your implementation of Phase II in the County of York by the deadline of October 1, 2001, would be greatly appreciated. Please contact the undersigned at (757) 890-3620 if there is any question and to coordinate implementation of Phase II service.

Sincerely,
